

You may not be getting any younger, but that doesn't mean you have to look your age.

I want to look and feel young to keep up with my young family. That's why we offer the most advanced skin care with pharmaceutical grade ingredients so you can get the professional results you desire. Most department store skin care contains only 5 - 8% active ingredients at neutral pH levels so products just sit on top of your skin. We research each product to ensure significant levels of active ingredients at pH levels that can renew your skin. All you have to do is be consistent to get the desired results. Collagen synthesis with vitamin C, for example, has shown to take up to six months in laboratory studies. The vitamin C must be stable, as it is in our products.

We endeavor to stay on the leading edge, offering the most effective skin care available. Our professional strength, proprietary products provide results to help you uncover your most youthful appearance.

Spa

www.spabeauty.com

We search for the best skin care so you won't have to.

With thousands of anti-aging products available, it's hard to know what will achieve the healthy, youthful appearance you're looking for. Luminescence stays abreast the latest research, matching it up with the best skin care in the world. At a recent symposium, scientists and doctors agreed the number one way to repair wrinkles and build collagen is strong concentrations of active ingredients (glycolics and vitamins A and L-ascorbic C in particular).

We make sure we offer products with high levels of active A, C, glycolics and more at pH levels that get results. Then, we recommend a layering approach: Apply Deep Crease Eraser 10% Glycolic, page 3, under Retinol A+C+E 20, page 3 - a great night time treatment. We make lots of recommendations throughout the catalog of effective combinations to give your skin a balanced diet of vitamins and nutrients that rejuvenate skin and help slow the thinning and wrinkling process of aging skin.

NO MORE RED FACE PAGE 35

This luxurious mask nourishes skin, neutralizes redness and rehydrates rosacea stricken red complexions.
